Membership enquiries to Dr Brian Hitchon, Alberta Research Council, P.O. Box 8330, Postal Station F, Edmonton, Alberta T6H 5X2, Canada

Applied Geochemistry is published bimonthly.

Publishing, Subscription and Advertising Offices: Pergamon Journals Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K. (Tel. Oxford 64881; Telex 83177); Pergamon Journals Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A. (Tel. (914) 592 7700; Telex 13-7328).

Annual Subscription Rate 1987: For libraries, university departments, research institutions, government departments, and other multiple-reader institutions US \$95.00 (including postage and insurance). Two-year rate (1987/1988) US \$180.50.

Membership Subscription Rates: Members of the International Association of Geochemistry and Cosmochemistry may receive this journal for an additional \$15.00/year above their membership dues of \$10.00/year (total: \$25.00/year). Individuals may choose to be a member of I.A.G.C. for \$10.00/year and not receive this journal. Prices are subject to change without notice.

Subscription enquiries from customers in North America should be sent to: Pergamon Journals Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A., and for the remainder of the world to: Pergamon Journals Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K.

Editorial Acknowledgements

Applied Geochemistry has completed its first year of publication with an impressive variety of papers in effectively all fields commonly covered by the appellation "applied geochemistry". Most of the production goals have been met, and a successful bi-monthly journal has been launched. None of this could have been accomplished without the dedicated work of the Associate Editors, referees, and the I.A.G.C. Publications Committee. The list below acknowledges all who have contributed to our success, but I particularly wish to express my thanks and appreciation to Dr. A.A. Levinson without whose support, dedication, effort and advice this entire venture would never have been the success it clearly has become. Special thanks are also due to my secretary, Mrs. Kathie Skogg, who has unfailingly met all requirements in an exemplary manner. Finally, I wish to recognize the excellent relations developed with the staff of Pergamon Journals Ltd., particularly the copy editors Russell Allen and Geoff Roberts, the Senior Managing Editor Peter A. Henn, and above all Mr. Gilbert Richards, Managing Director of Pergamon Journals Ltd., whose foresight and assistance in starting Applied Geochemistry have been fully justified.

CONTENTS OF VOLUME 1

NUMBER 1

F. Earl Ingerson Festschrift (Part 1)

BRIAN HITCHON: Editorial	1
MARC H. GRUNENFELDER: Foreword.	3
MICHAEL FLEISCHER: A tribute to F. Earl Ingerson	5
Articles	
BRIAN HITCHON: International Association of Geochemistry and Cosmochemistry: a history.	7
KONRAD B. KRAUSKOPF: Aqueous geochemistry of radioactive waste disposal	15
JOHN D. SAXBY and MICHIO SHIBAOKA: Coal and coal macerals as source rocks for oil and gas ...	25
JEFFREY S. HANOR and AUDREY L. WORKMAN: Distribution of dissolved volatile fatty acids in some Louisiana oil field brines	37
HALLDÓR ÁRMANNSSON, GESTUR GÍSLASON and HELGI TORFASON: Surface exploration of the Theistareykir high-temperature geothermal area, Iceland, with special reference to the application of geochemical methods	47
JOHAN C. VAREKAMP and PETER R. BUSECK: Global mercury flux from volcanic and geothermal sources	65
H. A. DAVEY and J. C. VAN MOORT: Current mercury deposition at Ngawha Springs, New Zealand	75
A. P. JONES and P. J. WYLLIE: Solubility of rare earth elements in carbonatite magmas, indicated by the liquidus surface in $\text{CaCO}_3\text{-Ca(OH)}_2\text{-La(OH)}_3$ at 1 kbar pressure	95
GLENDIA B. MICHAELS and WALTER C. RIESE: Microbiological exploration for mineral deposits: a new technique.	103
R. FUGE, M. J. ANDREWS and C. C. JOHNSON: Chlorine and iodine, potential pathfinder elements in exploration geochemistry	111
K. NORRISH, H. ROSSER and L. J. WARREN: A geochemical study of the forms of metals present in sediments from Spencer Gulf, South Australia	117
W. SACKETT, G. BROOKS, M. CONKRIGHT, L. DOYLE and L. YARBRO: Stable isotope compositions of sedimentary organic carbon in Tampa Bay, Florida, U.S.A.: implications for evaluating oil contamination	131
NORMAN HERZ and NANCY E. DEAN: Stable isotopes and archaeological geology: the Carrara marble, northern Italy	139
JACOB I. D. ADEKEYE and ALVIN J. COHEN: Correlation of Fe^{4+} optical anisotropy, Brazil twinning and channels in the basal plane of amethyst quartz	153
J. N. WALSH and R. A. HOWIE: Recent developments in analytical methods: uses of inductively coupled plasma source spectrometry in applied geology and geochemistry	161
Papers to appear in forthcoming issues.	173

NUMBER 2

F. Earl Ingerson Festschrift (Part 2)

Articles

M. L. JACKSON: Geochemical characteristics of land and its effect on human heart and cancer death rates in the United States and China	175
TERRI L. WOODS and ROBERT M. GARRELS: Use of oxidized copper minerals as environmental indicators	181
ROBERT O. FOURNIER and BRUCE B. HANSHAW: Geochemical evaluation of the geothermal resources in the San Marcos region, Guatemala	189
M. GASCOYNE: Evidence for the stability of the potential nuclear waste host, sphene, over geological time, from uranium-lead ages and uranium-series measurements	199
R. A. BINNS and E. C. APPELEYARD: Wallrock alteration at the Western System of the CSA Mine, Cobar, New South Wales, Australia	211
EDWARD D. GOLDBERG, VERN HODGE, PETER KAY, MARTHA STALLARD and MINORU KOIDE: Some comparative marine chemistries of platinum and iridium.	227
KEITH E. CHAVE, CHARLES L. MORGAN and WILLIAM J. GREEN: A geochemical comparison of manganese oxide deposits of the Hawaiian Archipelago and the deep sea	233
JOEL S. LEVENTHAL, TED A. DAWS and JAMES S. FRYE: Organic geochemical analysis of sedimentary organic matter associated with uranium	241
C. J. BLAND and A. A. LEVINSON: Non-significant anomalies in the search for uranium in Saskatchewan, Canada.	249
JOHN G. CATTS and DONALD LANGMUIR: Adsorption of Cu, Pb and Zn by δ MnO ₂ : applicability of the site binding-surface complexation model.	255
JAMES R. O'NEIL, CLARK M. JOHNSON, LLOYD D. WHITE and EDWIN ROEDDER: The origin of fluids in the salt beds of the Delaware Basin, New Mexico and Texas	265
LIBERTO DE PABLO-GALÁN: Geochemical trends in the alteration of Miocene vitric tuffs to economic zeolite deposits, Oaxaca, Mexico	273
KAZUE TAZAKI, W. S. FYFE and C. B. DISSANAYAKE: Weathering of phosphatic marble to exploitable apatite deposit, Sri Lanka.	287
F. M. SWAIN: Composition of marsh gases in the central and eastern United States	301
W. E. BAKER: An application of soil humic substances to geochemical exploration	307
M. E. THOMPSON, A. S. FRASER and H. G. THODE: Sulfate yields and isotopic ratios of sulfate sulfur in rivers of the Northwest Territories, Canada	311
Papers to appear in forthcoming issues	315

NUMBER 3

F. Earl Ingerson Festschrift (Part 3)

Y. SEKI, F. W. DICKSON, J. G. LIOU, Y. OKI, H. SAKAI and T. HIRANO: Geochemical prediction of impending catastrophic inflow of seawater during construction of the undersea part of the Seikan Tunnel, Japan	317
BRUCE M. THOMSON, PATRICK A. LONGMIRE and DOUGLAS G. BROOKINS: Geochemical constraints on underground disposal of uranium mill tailings	335
G. LOCKE and K. K. BERTINE: Magnetite in sediments as an indicator of coal combustion	345
CHRISTOPHER R. RINGROSE, RUSSELL S. HARMON, SIMON E. JACKSON and CLIVE M. RICE: Stable isotope geochemistry of a porphyry-style hydrothermal system, West Silverton District, San Juan Mountains, Colorado, U.S.A.	357
COLIN E. DUNN and ERIC HOFFMAN: Multi-element study of vegetation from a zone of rare-earth rich allanite and apatite in northern Saskatchewan, Canada	375
H. KUNZENDORF, R. GWOZDZ, H. J. HANSEN and N. SVENDSEN: Trace elements in a North Sea drill core	383
RENE LEFEBVRE and IAN HUTCHEON: Mineral reactions in quartzose rocks during thermal recovery of heavy oil, Lloydminster, Saskatchewan, Canada	395
R. A. KYDD and A. A. LEVINSON: Ammonium halos in lithogeochemical exploration for gold at the Horse Canyon carbonate-hosted deposit, Nevada, U.S.A.: use and limitations	407
ANGELA M. RAE and MIRO IVANOVICH: Successful application of uranium series dating of fossil bone	419
WILLIAM BACK: Role of aquitards in hydrogeochemical systems: a synopsis	427
Papers to appear in forthcoming issues	439

NUMBER 4

V. K. LUKASHEV: Some scientific and applied problems of supergene geochemistry in the U.S.S.R.	441
N. A. ROSLYAKOV and N. V. ROSLYAKOVA: Evaluation of the economic potential of gold deposits by the analysis of oxidized ore outcrops and exogenic aureols: methods used in the U.S.S.R.	451
T. T. TAISAEV: Geochemical exploration methods for gold in areas with mountain glaciation in Siberia, U.S.S.R.	463
KAREN J. WENRICH: Geochemical exploration for mineralized breccia pipes in northern Arizona, U.S.A.	469
M. L. JACKSON, J. Z. ZHANG, C. S. LI and D. F. MARTIN: The geochemical availability of soil Zn and Mo in relation to stomach and esophageal cancer in the People's Republic of China and U.S.A.	487
M. IKRAMUDDIN, L. BESSE and P. M. NORDSTROM: Thallium in the Carlin-type gold deposits	493
R. A. ZIELINSKI, C. A. BUSH and J. N. ROSHOLT: Uranium series disequilibrium in a young surficial uranium deposit, northeastern Washington, U.S.A.	503
DOUGLAS G. BROOKINS: Rhenium as analog for fissiogenic technetium: Eh-pH diagram (25°C, 1 bar) constraints	513

M. J. ANDREWS and R. FUGE: Cupriferous bogs of the Coed y Brenin area, North Wales and their significance in mineral exploration	519
D. PEACHEY, J. W. AUCOTT, J. L. ROBERTS, B. P. VICKERS and A. J. BLOODWORTH: Rapid colorimetric test to differentiate between bauxite-rich material and clay in exploration samples.	527
Erratum	531
Papers to appear in forthcoming issues	533

NUMBER 5

I. T. RALSTON, A. A. LEVINSON and R. S. HARMON: Uranium series disequilibrium in young lacustrine sediments from an arid environment at Henkries, Republic of South Africa	535
ROGER STOFFREGEN: Observations on the behavior of gold during supergene oxidation at Summitville, Colorado, U.S.A., and implications for electrum stability in the weathering environment.	549
GLENDA B. MICHAELS and WALTER C. RIESE: Luminometry and isotopy in microbiological exploration for mineral deposits	559
A. A. BEUS and V. V. LJAKHOVICH: On the ore producing potential of granitoids: experiences in the U.S.S.R.	567
ERDEM F. IDIZ, DONALD CARLISLE and I. R. KAPLAN: Interaction between organic matter and trace metals in a uranium rich bog, Kern County, California, U.S.A.	573
E. ROSENTHAL and A. MATES: Iodine concentrations in groundwater of northern Israel and their relation to the occurrence of goiter.	591
FRANCOIS CARON, ANDRE TESSIER, JAMES R. KRAMER, HENRY P. SCHWARCZ and CHARLES E. REES: Sulfur and oxygen isotopes of sulfate in precipitation and lakewater, Quebec, Canada	601
P. KAUSHANSKY and S. YARIV: The interactions between calcite particles and aqueous solutions of magnesium, barium or zinc chlorides	607
R. S. ROCHE, D. R. SALOMON and A. A. LEVINSON: The application of non-isothermal programmed pyrolysis-mass spectrometry to geochemistry.	619
Book Review	
R. R. BROOKS: "Mineral Exploration: Biological Systems and Organic Matter" edited by D. Carlisle, W. L. Berry, I. R. Kaplan and J. R. Watterson	627
Announcement	
World Catalogue of Primary Geochemical Signatures of Mineral Deposits	629

NUMBER 6

P. D. JENDEN and I. R. KAPLAN: Comparison of microbial gases from the Middle America Trench and Scripps Submarine Canyon: implications for the origin of natural gas	631
J. N. ANDREWS, N. HUSSAIN, A. S. BATCHELOR and K. KWAKWA: ²²² Rn solution by the circulating fluids in a "hot dry rock" geothermal reservoir	647
V. DUCHI, A. A. MINISALE and R. ROSSI: Chemistry of thermal springs in the Larderello-Travale geothermal region, southern Tuscany, Italy.	659
A. I. PEREL'MAN: Geochemical barriers: theory and practical applications	669

BRUCE T. MARSHALL and JANET S. HERMAN: Trace element distribution in the soils above deeply weathered pegmatites, Virginia, U.S.A.: implications for exploration.....	681
HERBERT V. WEISS and DAN PAVONE: A ^{238}Pu heat source in marine coastal sediment: formation of a protective concretion	691
D. GRONDIN and C. BARBEAU: Selective extraction of anthropogenic lead from sediments using Tiron	697
M. KOIDE, V. F. HODGE, J. S. YANG, M. STALLARD, E. G. GOLDBERG, J. CALHOUN and K. K. BERTINE: Some comparative marine chemistries of rhenium, gold, silver and molybdenum	705
T. W. D. EDWARDS and P. FRITZ: Assessing meteoric water composition and relative humidity from ^{18}O and ^2H in wood cellulose: paleoclimatic implications for southern Ontario, Canada	715
Book Review	
M. L. JACKSON: "Environmental Geochemistry and Health: Report to the Royal Society's British National Committee for Problems of the Environment" edited by S. H. U. Bowie and I. Thornton	725
Announcement	
Pergamon Geothermal Energy Award	727
Papers to appear in forthcoming issues	729

VOL.
1
1986

MAJOR CLASSIFICATION INDEX OF ARTICLES

ARCHAEOLOGICAL GEOCHEMISTRY

- Assessing meteoric water composition and relative humidity from wood cellulose 715-723
- Distinguishing Carrara marble using stable isotopes 139-151
- Uranium-series dating of fossil bone 419-426

ENVIRONMENTAL GEOCHEMISTRY

- Anthropogenic lead in sediments 697-704
- Composition of marsh gases 301-305
- Geochemical prediction of seawater inflow during tunnel construction 317-333
- Global mercury flux from volcanic and geothermal sources 65-73
- Implications for evaluating oil contamination using stable isotopes 131-137
- Magnetite in sediments as an indicator of coal combustion 345-356
- Metal-contaminated sediments adjacent to a lead zinc smelter 117-130
- Oxidized copper minerals as environmental indicators 181-187
- ^{238}Pu heat source in marine coastal sediments 691-696
- Radioactive waste disposal
 - Aqueous geochemistry of radioactive waste disposal 15-23
 - Rhenium as analog for fissiogenic technetium 513-517
 - Stability of sphene, a potential nuclear waste host 199-210
 - Underground disposal of uranium mill tailings 335-343
- Sulfate yields and isotopic ratios of sulfate sulfur in rivers 311-314
- Sulfur and oxygen isotopes of sulfate in precipitation and lake water 601-606

EXPLORATION: ENERGY RESOURCES

- Geothermal resources
 - Geochemical evaluation of geothermal resources, Guatemala 189-197
 - ^{222}Rn solution in a hot-dry-rock geothermal reservoir 647-657
 - Surface geochemical exploration in a high-temperature area 47-64
 - Thermal springs in the Larderello-Travale geothermal region, Italy 659-667
- Petroleum and natural gas
 - Coal and coal macerals as source rocks for oil and gas 25-36
 - Dissolved volatile fatty acids in oil field brines 37-46
 - Trace elements in a North Sea drill core 383-394
- Submarine microbial gases: implications for natural gas origin 631-646
- Uranium
 - Non-significant anomalies in the search for uranium 249-253
 - Organic matter and trace metals in a uranium-rich bog 573-590
 - Sedimentary organic matter associated with uranium 241-247
 - U-series disequilibrium in a young surficial uranium deposit 503-511
 - U-series disequilibrium in young lacustrine sediments from an arid environment 535-548

EXPLORATION: MINERAL RESOURCES

- Gold
 - Ammonium halos in lithogeochemical exploration for gold 407-417
 - Behaviour of gold during supergene oxidation 549-558
 - Evaluation of gold deposits: USSR methods 451-462
 - Exploration for gold in areas with mountain glaciation 463-468
 - Thallium in Carlin-type gold deposits 493-502
- Industrial minerals
 - Alteration of vitric tuffs to economic zeolite deposits 273-285
 - Rapid colorimetric test to differentiate between bauxite-rich material and clay 527-529
 - Weathering of phosphatic marble to an exploitable apatite deposit 289-300
- Manganese nodules
 - Comparative marine chemistries of platinum and iridium 227-232
 - Comparative marine chemistries of Re, Au, Ag, and Mo 705-714
 - Geochemical comparison of manganese oxide deposits 233-240
- Microbiological methodology
 - A new technique for microbiological exploration for mineral deposits 103-109
 - Luminometry and isotopy in microbiological exploration for mineral deposits 559-565
- Rare earth elements
 - Multi-element study of vegetation from zone of rare-earth rich allanite and apatite 375-381
 - Solubility of rare earth elements in carbonatite magmas 95-102
 - Trace elements in soils above deeply weathered pegmatites 681-690
- Other metallic deposits
 - Adsorption of copper, lead, and zinc by MnO_2 255-264
 - Application of NIPY-MS to geochemistry 531, 619-625
 - Application of soil humic substances to geochemical exploration 307-310, 531
 - Chlorine and iodine as potential pathfinder elements 111-116
 - Geochemical barriers: theory and practical applications 669-680
 - Geochemical exploration for mineralized breccia pipes 469-485
 - Interaction between calcite and metal chloride solutions 607-618
 - Ore producing potential of granitoids: USSR experience 567-571
 - Significance of cuperiferous bogs in mineral exploration 519-525

Other metallic deposits

Stable isotope geochemistry of a porphyry-style hydrothermal system 357-373

Supergene geochemistry in the USSR 441-449

Wallrock alteration, CSA Mine, Cobar, Australia 211-225

MEDICAL GEOCHEMISTRY

Human heart and cancer death rates, USA and China 175-180

Iodine in groundwater and the relation to goitre 591-600

Soil Zn and Mo in relation to stomach and esophageal cancer, China and USA 487-492

UPGRADING ENERGY AND MINERAL RESOURCES

Mineral reactions in quartzose rocks during thermal recovery of heavy oil 395-405
